PROFESSIONAL PROFILE

Results-driven professional with over 11 years of experience, including 6 years working with Python, SQL, Excel, and Looker in data-intensive and automation-focused environments. Proven track record in developing robust tools for automated reporting, web scraping, and decision-support systems, enhancing operational efficiency and business insights. Skilled in building scalable, secure solutions and translating complex data into actionable outcomes. Completed a BSc in Data Science and Computing at Birkbeck, University of London, complementing degrees in Business and Software Engineering from Imperial College London.

EMPLOYMENT HISTORY

Software Engineer - Data Analyst
Feb 2023 – Present

GROUP NEXUS, LONDON

- Automated manual tasks using AppScript, Python (Selenium, Pandas, NumPy, OpenPyXL, ReportLab & XML), and VBA to boost efficiency.
- Managed visit, revenue, cancellation and permit reports, delivering insights and trend analysis to support strategic business decisions.
- Assisted in creating APIs to integrate CSV and XLSX files into Big Data servers (AWS & GCP), improving predictive modelling.
- Processed and modelled global car park data, identifying key performance indicators to enhance reporting accuracy and efficiency.
- Built dynamic dashboards in Excel and Looker for real-time monitoring and stakeholder reporting.

Key Achievements:

- Selected from 250 employees to undertake a sponsored Software Engineer course, where I developed better skills in OOP, python scripts, SQL and Relational Databases, Version Control (Git), Agile Development and Software Design.
- Automate the refunds process, that is saving 8 people's full working day and reducing human error.
- Automated reporting download processes, saving for 3 team members a total of 5 working days each month.
- Designed and implemented automated macros in Google Sheets using JavaScript (AppScript), saving around 4 hour per day.

Data Analyst - Accounts Payable
Sep 2015 – Jan 2019

CSC - ALGAR, MG, BRAZIL

- Performed in-depth analysis of travel documents and receipts, and root cause investigation to ensure compliance with regulations.
- Introduced Scrum methodology to the T&E team, streamlining operations and enhancing the effectiveness of compliance monitoring.
- Delivered reports and insights to executive stakeholders, that supported budget recovery and influenced key operational decisions.
- Collaborated with the risk management team to drive continuous improvement through People, Process, and Technology.
- Managed invoice entries and deadlines, allocating tasks efficiently within the team and leveraging Power BI visualisation tools.

Key Achievements:

- Conducted analysis that successfully reduced by over 15% the amount of employee travel expenses (approx. £150k per month).
- Streamlined the employee travel booking process from 15 to 3 days by creating new documentation formats.
- Automated reports saving 3 hours a day by using VBA.

SKILLS

Programming Languages & Technical Skills

- Python: Pandas, Selenium, OS, XlsxWriter, Numpy & Autopy
- SQL: Data Querying & Relational Database Design
- Frontend: HTML, CSS & JavaScript
- Java & R: Object-oriented and data-driven applications
- Automation: Python, VBA, APIs & Google App Script
- Cloud & Tools: AWS, GCP, Azure, BigQuery & GitHub
- Looker, Excel (expert) & Machine Learning (ML) models

Software Development Practices

- Agile Dev, Unit Testing & debugging, System Design

Soft Skills

- Strong problem-solving and logical thinking
- Collaborative team player with effective communication skills
- Languages: English (fluent) | Portuguese (native) |

OTHER PROJECTS

Data Management: SQL for Data Analytics and Business Intelligence.

Frontend Project: Travel Guide (University Project).

Predictive: University Final Project.

Freelancer: Payment for Uber/Bolt client company.

Facilities Manager: Volunteering - At Shalom College in MG, Brazil.

EDUCATION & CERTIFICATIONS

BA - Data Science and computing – First Birkbeck, University of London – UK	2022 2025
Bootcamp - Software Engineer – Ranked 1 out of 310 Imperial College London – Portfolio Certification – UK	2023 2024
BA - Business, Accounting and Communication – First University Center of Triangulo – Brazil	2008 2013
